# THE CROSSFIELD CHRONICLE.

VOL. XXII. No. 43

CROSSFIELD ALBERTA, THURSDAY NOVEMBER 7th, 1929.

PRICE \$2.00 A YEAR

Now

## 1000 Farms without a Horse!

In 1910 many men still held out against the horseless carriage. But those who did were looking back. They could not keep the horse on the highways. Nobody could! Today all the world rides on rubber. Men and their merchandise travel swiftly by motor power.

It is the same on the farms. We have seen the passing of the tools of hand harvest, the oxcart, the walking plow, and many other things that bring back memories of slow labor and profitless toil. Old methods make way for methods that are better, faster, easier, more economical, and more profitable.

Animal power cannot handle the big-scale equipment the farmers are buying these days. Day by day animal power is passing out of the picture. Everywhere the great and tireless tractor is taking over the work, cutting down the cost of production, and increasing the profits. Already thousands of horseless farmers handle every operation by McCormick-Deering power alone.

**Let's Talk About Next Spring Now,  
While We've Lots of Time.**

**William Laut**

## CROSSFIELD GARAGE

F. T. BAKER, Proprietor

Agent for:

Nash, Chevrolet Cars and Trucks

We are still doing business at the location. Our Gasoline Service

Station is in working order.

Agents for:

British American Gasoline, Kerosene, Oils and Greases.

Phone 4

Crossfield, Alberta.

## Wheat Pool Meetings

Members of the Alberta Wheat Pool and all others who may be interested, both men and women, are requested to attend pool meetings to be held at—

### CROSSFIELD

On November 12th at 2 p.m.

### OLDS

On November 12th at 8 p.m., in Olds Agricultural School

### CARSTAIRS

On November 13th at 2 p.m.

### BOWDEN

On November 14th at 2 p.m.

**Speaker - BEN S. PLUMER, Director  
for South Calgary District**

Enjoy Your Meals  
at the

### OLIVER CAFE

We Aim to Please You  
GEORGE & FONG  
Crossfield

TO BE SHOWN at the U. F. A HALL, Crossfield  
William Haines and Joan Crawford  
In "THE DUKE STEPS OUT"  
Thursday Evening, November 14th  
Shows commence at 8.30 p.m.

## AGRICULTURAL FAIR WILL BENEFIT THE COMMUNITY

New Year's Dance To Be Given  
By The Agricultural Society

The Officers of the Crossfield Agricultural Society have reserved the U. F. A. hall for New Year's eve, when they will put on one of the best dances of the season. An Agricultural fair in this vicinity is necessary for the betterment of the community and the officers have fully made up their minds to see to it that Crossfield and district will be represented among the list of fairs next year. A boost for an annual fair, is a boost for your own interests and the community as a whole. It all helps to increase the value of your holdings in this neighborhood.

## Crossfield School Report

The following are the average obtained by the pupils of the Crossfield School in the quarterly examinations.

Room 4 — High School.	
Mayta Schaffer	77.7 (7) II
Frank Mai	75 (6) II
Florence Cameron	72.8 (8) II
Grace Williams	65.1 (9) II
Eva Jarmain	61.7 (7) II
Delphine Billo	58 (5) III
Fern Hemm	56.8 (7) II
Austin Whirlans	54.6 (8) II
Vava Green	54 (6) I
Gordon Johnson	53 (6) I
Charles Laut	51.7 (7) II
Helen Fleming	51.2 (7) II
Kathleen Main	51.2 (7) II
Frank Low	48.2 (5) III
Ida Calhoun	45.6 (5) III
Ina Heywood	43.6 (6) I
Clara	45 average.... 57.7 per cent
The numeral in the brackets indicates the number of subjects the student is carrying. The Roman numeral indicates the year of high school.	

Not Ranked:— Frances Mobb, Marjorie Young, Rowland Fleming, Donald Fleming, and Russell James.

Room 3, Grade VIII.	
Alma Gordon	85.2

### Personal Greeting Cards

We have just received a sample book containing the very latest designs in personal Christmas cards. Visit the Chronicle Office and inspect them.

The few dollars you spend on Greeting cards is probably the most wisely spent money of the year.

It solves your Christmas Gift proposition in an economical manner.

If it were not for Christmas you could not greet your friends.

These samples are better than any competing line and the prices are the lowest in Canada.

See our "Golden Dollar Box" of ten assorted cards — a special value for your advantage.

Supposing no one took the trouble to send their Christmas wishes to you — it would be a dreary world.

The Crossfield Chronicle

### NEW MEAT MARKET OPENED TO SERVE YOU

Messrs Royer & Gazeley wish to announce to the public that they have opened an up-date shop in the premises west of the Bank of Commerce. Their customers can rely on a square deal and courteous treatment.

## Figures Showing Cost Of Wars Should Bring Home To Everyone The Futility Of Armed Conflict

Everyone must fight if we have another war. The fighting won't be only on the battlefields. There will be fighting on the land and on the sea and in the skies. It will be carried right into the homes of the peoples. Everyone will fight — and everyone will lose. The cost would be enormous, and part of the price might be our civilization. Even the victors must lose in modern warfare.

The Napoleonic wars (1799-1815), a conflict that lasted 8,000 days, killed 2,100,000 human beings, and cost \$3,070,000,000.

The American Civil War (1861-1865) lasted 1,350 days, cost \$35,000,000, and \$7,000,000,000.

The Franco-Prussian war (1870-1871) lasted for 210 days and cost 280,000 lives and \$3,210,000,000.

The Russo-Japanese war (1904-1905), lasted 548 days, cost 160,000 lives and \$2,100,000,000.

The above figures are for wars of the past, but how they pale before those of the World War!

The World War (1914-1918), lasted 1,683 days, cost 9,819,000 lives and \$186,233,637,000.

Now, all the real property in the United States, from the Canadian border to the boundaries of Mexico, and from the Atlantic to the shores of the Pacific Ocean, are worth considerably less than the cost of the World War.

It should interest and impress all engineers, business men, and all other people with common sense to learn that all the steam railroads and their equipment, all the motor vehicles, all the drivers, all the telephones, all the telegraph systems, all the telegrams, all the electric light and power stations of the entire United States of America could be purchased for a sum of money considerably less than one-quarter of the cost of the World war.

We have been told that of all the monies raised from the peoples of the earth in taxation, eighty cents out of every dollar goes to defray the costs of the wars of the past and in the preparation of future wars. The thing is absurd.—General Electric Review: 1929.

### Prizes For Canadian Fruits

Exhibits From Dominion Win Awards At British Exhibition

Thirteen first prizes in apples, one first in pears and four seconds in apples were awarded to Canadian exhibitors at the Imperial Fruit Show, which was held at Bingley Hall, Birmingham, England. Cables advised received at Ottawa by the Department of Agriculture. Eight of the first prizes were won by Nova Scotia apple growers, and four by British Columbians. Nova Scotians secured the three second prizes. The most successful individual Canadian exhibitor was Charles A. Bentley, of Berwick, N.S., who secured no fewer than five firsts. The Associated Growers of British Columbia, Limited, of Vernon, B.C., obtained three.

The British Columbia company were also successful in the British Empire section, securing a first and second prize.

### Record For Building

Building permits issued in Canada during the first eight months of this year reached a total of \$168,406,059. Not only was this the highest for the period ever recorded by the Dominion Bureau of Statistics, but it was 16 per cent above the previous high record in 1928.

Then there was the Scotchman who, when asked what he had clenched in his fist, answered: "My wife's false teeth—she's been eating between meals."

Venice, Italy, is built on seven hills, and is called the "City of the Seven Hills."

In 1922 the first telephone conversation across the Atlantic took place.

"You eat all day, but work? Never! I don't believe you are listening to what I say."

"I thought you were talking to yourself, sir,"—Ludwig Körner Zeitung, Cologne.

W. N. U. 1810

### Rural Credits

#### Domestic Farm Loans Board Now Operating In Six Provinces

The provinces of Manitoba which has just recently come within the scope of the Domestic Farm Loans Board's operations, brings the total of the provinces now embraced within the scheme up to six, declared Dr. J. D. MacLean, chairman of the Board here recently. Alberta, British Columbia, Manitoba, Quebec, Nova Scotia, and New Brunswick, are the first dozen in which the board operates.

Saskatchewan and Ontario have provincial system of rural credits, while Prince Edward Island apparently is need of neither the one or the other.

The work of the board has been extended rapidly into Quebec and Manitoba, and so far no applications for loans from these provinces have been received.

Since its inception until October 16 last, the board has approved 807 loans to the four provinces of Alberta, British Columbia, New Brunswick, and Nova Scotia; 67 have been rejected and 178 are pending. The total amount of money extended to applicants is \$100,000.

### SWATHED HIPLINE

A black crepe satin with buttons down the back is now youthful Paris vogue showing the very feminine note in swathed hips with huge puff at side wear. The hands. Sleeves are slender fitted and draped below the elbow.

Style No. 675 is cleverly designed to be dignified for afternoons.

It is a dressy affair for afternoons that is simple enough for general wear, and it doesn't require any trimming.

It is captivating in black transparent velvet or in printed velvet in bright tones.

Cheerful and canton crepe, plum shades in silk crepe, purple crepe Elizabeth, dull black silk crepe, and hunter's green canton crepe smartly paired.

It is easily made and the saving is remarkable.

It's a wonderful opportunity to buy a dressy outfit that shows such perfect taste for all-around afternoon occasions, at the cost of your time, fabric and a few hours of your time.

It is delivered in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34 and 36 inches bust.

Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### How To Order Patterns

Address—Winnipeg Newspaper Union,  
115 McDermot Ave., Winnipeg

Pattern No. .... Size. ....

Name. ....

"LAND OF THE SOVIETS"

Four Russian aviators flying the "Land of the Soviets" from Moscow to New York, took off on October 19, from Vancouver, Wash., for Oakland, Calif., first stopping point of their final long hop across the United States. The fliers were forced to land on account of engine trouble. The photographs show: (1) "Land of Soviets." (2) Philip Bolton, second pilot. (3) Dmitry Fuafay, mechanic. (4) Semen Shastakoff, chief pilot, and (5) Boris Syrievor, navigator.

### Received Queer Training

#### Men Unqualified With Farm Work Returning To England

Some 200 men, who are returning to England, admit that though they accepted training there at the public expense, together with free board and free transportation to Canada, they never intended to do farm work. If their statement that they never saw a cow or a plow in the course of their training is correct, it would be interesting to learn what kind of training they were given and how much like "Tally logos" the men's confession of their disqualification for farm work and the complaint about the training suggest an explanation of the refusal of the Canadian farmers, with whom they were placed, to pay the promised wage of 10 pounds a month.—Truth, London, England.

### To Study the Arctic

#### Expedition Of Graf Zeppelin Will Investigate Scientific Subjects

Dr. Walter Bliston, secretary and treasurer of the Arctic Arctic Society, announced plans for a voyage of Arctic exploration aboard the Graf Zeppelin to be taken next April by a group of 12 scientists headed by Fritz Jo Hansen. The principal objects of the projected expedition. Dr. Bliston said, would be to make the boundaries between the deep and shallow parts of the Arctic waters, to study meteorological conditions and to prepare for the establishment of scientific station in the ice fields.

The Wife: "There are two ways of looking at every question."

The Husband: "Yes, I know. Yours—and the wrong one."

### Says British Empire Not Commonwealth

#### Use Of This Title Wrong, Says Sir John Sandeman Allen

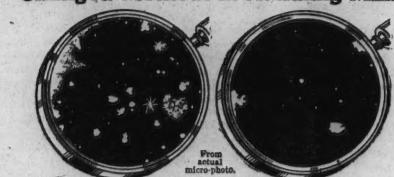

Call the British Empire a commonwealth of nations is quite wrong. The Toronto Board of Trade was told at the Royal York hotel by Sir John Sandeman Allen, J.P., M.P., chairman of the Royal Empire Society, member of council of the International Chamber of Commerce, and secretary of the commercial committee of the British House of Commons.

"Most people," he said, "talk about the empire as a commonwealth of nations. The empire is divided into three parts, of which the British commonwealth of nations is one. The government of the empire, and is made up of a group of independent nations, who are mutually interdependent. There is not one country, but 407 separate nations of different creeds and castes, who before the advent of British rule were continually at war with each other, the weaker preyed on by the strong. Now India is two-thirds ruled by native princes responsible to the British crown, and kept together by Pax Britannica. The third part of the British empire is the colonial empire. This is the countries where the populations are not yet fit to govern themselves entirely, but are ruled by the crown, under the principles of British freedom and equality for all."

Hailstorms are frequent and severe in sub-tropical regions and are rare in the coldest parts of the earth.

The White House was first painted white to obliterate marks of fire left by the British invasion in 1814.

### Changed Methods in Handling Milk

Where proper sanitary measures are neglected the bacteria in a drop of milk are many.

How much do the farmers and dairymen of Canada and United States pay to bacteria in milk? In process of arriving at the answer to this question, representatives of leading milk and dairy products companies of New York recently met with officials of the State Agricultural Experiment Station, with the Department of Farms and Markets and the College of Agriculture at the Experimental Station, Geneva.

The bacterial count is being used more and more as a basis for determining how much per pound a farmer is to be paid for his milk.

Getting the bacterial count under a certain figure is the same as getting the number of persons employed there.

It is remarkable how quickly these are able to live in the milk.

It is remarkable how quickly these are able to live in the milk.

Precautions start at the beginning of milk production and continue clear through until the time the milk is in the hands of the consumer.

To begin with, properly ventilated, easily cleaned stables are provided; plenty of bedding is given the cows;

platforms are built the right length to accommodate the particular breed of cows that are kept; the gutter is built wide and deep; the animal

is clipped about the udder and flanks periodically. The cows are groomed carefully every day and just before milking, however, pieces of dirt are brushed off, or when the teats are clipped, wiped off with a damp cloth.

Small top milk pails are used to receive milk from the cows. Utensils such as milk pails, milk cans, milking machines and separators, are thoroughly sterilized after each milking.

The fresh-drawn milk is immediately removed to the cooling tank where it is cooled to a temperature of 50 degrees to 60 degrees Fahrenheit.

On receipt at the dairy, the creamery or the condenser, the same extreme sanitary precautions prevail.

White-garbed workers who observe rules of personal cleanliness as well as hygiene in the handling of milk and milk products, go about their duties efficiently and intelligently.

Immediately after the pasteurizing of whole milk, it is bottled and capped. The date of bottling is stamped on the cap and the milk is usually sold before 36 hours have elapsed since pasteurizing.

What differences over the old-time methods of handling milk?

It is these changed methods in the handling of the nation's milk supply that has swelled the individual consumption of milk to more than 54 gallons per year.

### Predicts That Crow's Nest Pass Agreement Will Govern Grain Rates On The Churchill Route

#### Lights Make Hens Lay

##### Increases Winter Production But Does Not Affect Yearly Total

In view of the fact that fresh eggs are nearly always a higher price during the winter season than during the summer many poultrymen have been interested in the possibility of increasing winter egg production by the use of artificial lights.

At the Dominion Experimental Station, Kapuskasing, Ontario, an experiment has been conducted for a period of five years in order to obtain some data on this subject.

The experiment covered a period of six months each year, from November 1 to April 30, during which time the electric lights were turned on for 12 hours in the evening and remained on until daylight. One hundred pullets were used. These were divided equally as to weight, general development and breeding into two pens of 50 each. All conditions were made similar except that the one pen had these extra hours of light to work.

Over a five-year period the pen on lights produced on the average 3,966 eggs, at a cost of 20 cents per dozen, in the six months; while the pen without lights produced 3,671 eggs at a cost of 22 cents per dozen. This gives an advantage of about 100 eggs for the pen on lights and a reduction in cost of 2 cents per dozen.

During two of the years covered by this experiment the test was continued until October 31, making the complete year. In the two-year average over the whole year, the pen with lights laid fewer eggs than the pen without lights.

From the figures obtained by this end, it would appear as though lights have an effect on the number of eggs laid during the winter months, when the eggs are highest in price, but on the other hand they do not seem to materially alter the total number obtained for the whole year.

#### Increased Demand For Beef

##### Price Will Be Higher Next Spring Is Prediction

Beef prices in Canada next spring will be high, due to the fact that there is a shortage of beef cattle in the country and comparatively few fat cattle going into winter feeding.

Trade reports for September show the exports of fresh beef to the United Kingdom as being nil, and the United States there was a falling off from \$1,107,205 to \$457,912.

No fresh beef has been shipped to the United Kingdom for several years past, and the demand so steady that there is only a price of two cents a pound between the best English killed beef and Canadian beef.

The cost of transportation is three cents a pound so that it does not pay to ship.

Supplies of cattle reaching Canadian markets at the present time are very moderate, say officials of the livestock branch, both in Eastern and Western Canada. There has been no liquidation, however, for lack of buyers, so the farmers have not done so badly.

The domestic demand at good prices indicates a measure of prosperity in the country, when people are able to buy meat at good prices despite the competition of the Canadian consumer wanting Canadian beef.

#### The Psychology Of It

If you scare the other fellow's fender, it is because he didn't give you enough room. If he scares your car, he is a nitwit driver whose license should be taken from him. And just so long as this is the psychology of motor car owners, space will be set aside in the newspapers each day to record accidents.

A mouse can pick up a scent more than a mile away.

He: "Have you heard that I have become an actor?"

She: "No, I only heard that you had gone on the stage."—Musicals, Vienna.

In the opinion of Hon. Charles A. Dunning, Minister of Railways, the Crow's Nest Pass agreement will govern the eastbound rates on grain and flour on the Hudson Bay Railway.

"There is no doubt in my mind," he said today, "that grain will travel to Churchill on a mileage basis the same as to Fort William." Mr. Dunning explained that he could not speak in regard to general freight rates, but grain was in a different category.

"In respect of all other rates," he said, "when the road approaches operation, the Canadian National will have to file their rate tariffs with the Board of Railway Commissioners and it will be open to everyone to appeal against these rates if they are not satisfactory."

Mr. Dunning said that he had been pleased to note that the people of Saskatchewan, in this respect, had not been inactive. The traffic organization of Saskatchewan, he believed, had been accumulating information on Hudson Bay route rates for some time and, undoubtedly, would defend the interests of shippers at the proper time before the rate making body—the railway board.

Mr. Dunning, as a matter of fact, has paid much less attention to the rail rate aspect of the Hudson Bay route than to the ocean rate. He regards the rail rates as being entirely within the jurisdiction of the Canadian National, the ocean rates outside.

Mr. Dunning has been able to give an equal interest to the success or failure of the route, which are not controllable by Canada. Therefore he has designed the policy of his department from the outset of his administration to obtain as much evidence as possible on the vital question of the safety and efficiency of the Hudson Strait from the viewpoint of navigation.

To this end, every ship which has been chartered by the government to carry supplies into Churchill or to sail in these waters, for any purpose whatever, has been chartered on the basis of time. As a rule, ships are chartered for a fixed period. The Dominion might have saved a little money by driving a hard and fast bargain with the owners of ships which have been chartered to sail in these waters. Mr. Dunning thought this would be unwise. He has chartered on time.

The result has been that he is building up a record of the time it has taken ships to go into Churchill and out again to home ports and is in a strong position to prove that the delays in navigating the Straits and the Bay, due to fog, ice or other perils, are negligible.

In regard to the general progress of the work, Mr. Dunning said that the railway will be in operation next summer and the port will be open for commerce in the fall of 1931. The past season has been very successful in every respect. The work at Churchill is well up to schedule. In fact, the work allotted for this year was completed on October 21, and the engineers took advantage of an extremely high tide on that night to beach the dredges and scows and tugs far back on the beach where there will be a minimum of risk from storms during the fall and spring.

During the summer 500,000 cubic yards of material had been removed from the harbor. It was only necessary for the dredges to stop work on one day on account of weather conditions.

While a little shore ice has been noticed at Churchill in the mornings during the last few days, Mr. Dunning stated that it would not impede navigation. With regard to the Straits, Mr. Dunning said that his reports today (Oct. 28), were to the effect that no ice is yet visible at any one of the three direction finding stations situated between the Atlantic and the Bay. Fox Channel ice, so often referred to as a peril to navigation in the autumn, has not yet been visible. It is to be hoped that there will be much difference in the temperature at Churchill and points inland. For example, the temperature on October 25 varied between 46 and 32 degrees above zero, which would compare favorably with most cities in Canada on that day.

#### Identity Not Important

The Governor of the State was inspecting some of its institutions. When he reached one of the insane hospitals he received a message to call his office on an important matter. Not getting as quick service as he thought he should, he barked at the operator, "I guess you don't know who I am?"

"No," replied the operator, "but I know where you are."

## LIQUOR CONTROL FAVORED BY VOTE IN NOVA SCOTIA

**Halifax.**—In a plebiscite on the liquor question the number of Nova Scotia voters who expressed a preference for government control and sale exceeded by more than 28,000 the number of those who indicated their desire that the present prohibition law be kept.

Both Dr. H. R. Grant, leader of the prohibition forces, and J. H. Winfield, heading the government control campaign, interpreted the figures as indicative of the defeat of the prohibition law.

Two questions were before the voters but thousands voted on only one. The questions were whether the prohibition law, known as the Nova Scotia temperance act, should be continued or whether a system of government sale should be set up.

With only 45 small polls unheard from out of a total of 1,137, the figures were:

For the temperance act, 61,672.

Against, 56,024.

For government control, 89,757.

Against, 41,180.

The vote will be interpreted officially by the government.

Premier E. N. Rhodes said he would wait for more complete information before making a statement.

Only Nova Scotia and Prince Edward Island of the provinces of Canada now have prohibition laws.

## Upholds Alberta Court Ruling

**Privy Council Says Certain Victory Bonds Liable To Death Duties**

**London, Eng.**—The judicial committee of the Privy Council dismissed with costs the appeal of the Royal Trust Company against the government of the province of Alberta.

The decision upholds an Alberta court ruling that succession duty is payable on certain Victory Bonds, portion of the estate of the late Wm. Hull, such bonds being "legally situated" within the province of Alberta.

The ruling is important as establishing liability of Dominion government bonds to succession duties taxation and it is understood the province of Alberta is a large financial gainer by the ruling.

H. P. McMillan, K.C., of London, and Attorney-General Hon. J. F. Lymburn of Alberta, represented the province and Geoffrey Lawton, K.C., London, and H. G. Noel, of Calgary, acted for the trust company.

## Lipton Building New Yacht

**Shamrock V. Being Constructed Under New York Club Rules**

**London, Eng.**—The keel of Sir Thomas Lipton's new challenger for the American Yacht Cup, Shamrock V, was laid at the Camper and Nicholson's yard at Gosport without ceremony.

Sir Thomas was not present. The yacht will be built to a 76-foot racing rule of the New York Yacht Club and will be fitted with a motor. The rig will be the same as that of the defender of the cup, thus promising a stirring contest for supremacy.

## Fort William's Founder Dead

**William P. McKellar Came To Lake Head In 1863**

**Fort William, Ont.**—Founder of the city of Fort William, Peter McKellar, is dead, at the age of 91 years. He was the last of the McKellar brothers who came to the lake head 66 years ago and formed the nucleus of the first settlement. McKellar was the first to discover gold, silver, copper, iron and lead in the Fort William area. He was a member of London and American Geological Societies.

**New Liner Near Completion**

**London, Eng.**—It is announced that the "Empress of Japan," the new 25,000 ton oil burner liner now building by the Fairchild Shipbuilding Company, Ltd., Scotland, will be launched on December 17 by Mrs. R. Peacock, wife of Mr. R. Peacock, director of the Canadian Pacific Railway. The "Empress of Japan" is to be based on the Pacific service of the Canadian Pacific between Vancouver, Japan and China.

**Fire Causes Serious Loss**

**Winnipeg.**—Fire destroyed the large cattle barn at the Manitoba Agricultural College and tons of hay stored in the loft of the building. The loss is estimated at \$35,000.

W. N. U. 1810

## Writ Has Been Issued

**General Higgins Asks Transfer Of Salvation Army Property**

**London, Eng.**—A writ on behalf of General Higgins, the new commander-in-chief of the Salvation Army, asking for transfer to himself of army property now held in the names of the executors of the late General Russell Booth has been issued.

The writ was served immediately on General Booth's executors, Mrs. Booth, Comptroller, Catherine Booth, his daughter and a solicitor, Sneath.

The situation at present is that while all property of the army in Great Britain is controlled by General Higgins, its ownership remains in the hands of General Booth's executors.

## An All-Canadian Menu

**Food From Every Province Will Be Feature At Winter Fair**

**Ottawa.**—A menu featuring foods gathered from coast to coast will be a feature arranged by the agriculture department for the opening of the National Winter Fair at Toronto, on November 20.

There will be oysters from Prince Edward Island, fish from Nova Scotia, maple syrup from Quebec, beef from the west, fruit from Ontario and British Columbia—a little something from each and every province to suit the epicurean tastes of the cattlemen.

## Will Erect Modern Elevators For Crop

**France To Have Up-To-Date Facilities For Handling Wheat**

**Coulonges, France.**—France is to have a modern system of grain elevators. Strange as it may seem, there are but few elevators in France, and most of those that are modern are at the ports.

France's wheat crop is stored rather haphazardly. Jean Hennessy, Minister of Agriculture, told a congress of farmers here that the government would help to build enough up-to-date elevators to handle 30,000 bushels, a tenth of this year's harvest.

## Plan Pacific Air Liners

**Monster Dirigibles To Operate Between California and the Philippines**

**Akron, Ohio.**—Two monster dirigibles, the largest in the world, are to be constructed and placed in regular operation between Southern California and the Philippines, in 1933, by the Pacific Zeppelin Transport Co., according to Paul W. Litchfield, chairman of the board. The Pacific Liners will carry 80 passengers and ten tons of mail, express and freight. They will cut in half the crossing time now made by the fastest boats.

## Canadians Are Defined

**Dominion Statistician Settles Controversy Over Long Standing**

**Ottawa, Ont.**—Every one of Canadian nationality is a Canadian; every one in the Dominion is of Canadian birth. This is the true Canadian family line of three generations residence or more in Canada, is a Canadian "in a special sense," according to a report issued by R. H. Coates, Dominion statistician.

The report would seem to settle a controversy of long duration as to just what constitutes a "Canadian."

## New Position For Dr. Gunn

**Victoria.**—Dr. W. R. Gunn, at present identified with the health of animal section of the Federal Department of Agriculture with headquarters in Toronto, has been appointed livestock commissioner for British Columbia, according to announcement of the provincial minister of agriculture, Hon. W. Atkinson. Dr. Gunn will assume his new duties on December 1.

## Leaves Wheat Pool

**Winnipeg.**—E. B. Ramsay officially leaves the post of general manager of the Canadian Co-operative Wheat Producers and takes over the chairmanship of the Board of Railway Commissioners. No successor to Mr. Ramsay has been appointed. He will continue to act in an advisory capacity on all matters which come up during his tenure of office.

## Dunning Will Come West

**Ottawa, Ont.**—Hon. Charles Dunning, Minister of Railways, will join Premier Mackenzie King on the latter part of his western tour and return with him to Ottawa. Mr. Dunning will meet Mr. King at Regina, when the prime minister is returning, and will be present at the various meetings held on the eastward journey.

## VICTORY FOR FERGUSON FORCES IN ONTARIO

**Toronto.**—Premier G. Howard Ferguson, with his Conservative government intact and a greatly increased army of supporters, is now more solidly entrenched as the dominant political force in the province of Ontario.

The ranks shattered by the defeats inflicted by the Conservatives in rural strongholds they regarded as invulnerable, only a corporal's guard of opposition strength will face the government when the legislative assembly, the 18th in the history of the province, convenes to elect the legislature for a greater Ontario, on which Premier Ferguson based his appeal to the people.

In giving the Ferguson government a mandate to administer the affairs for a third successive term, the people of Ontario gave the administration the strongest legislative representation ever accorded a government.

The sweeping victory which preceded the hopes of the most optimistic government supporters was a ringing answer to the prime minister's declaration that he was willing to take his political life on the government's shoulders. The issue of confidence in the government's sale of liquor by the government to the extent on which he was returned to power in the 1926 general election.

The standing is compared with the 1926 election follows:

Party	1929	1926
Conservatives .....	93	77
Liberals .....	9	21
Progressives .....	3	11
U. F. O. ....	1	13
Ind. Conservatives .....	1	0
Liberal-Progressives .....	1	0
Deferred .....	1	0
Doubtful .....	3	0
Total .....	112	112

The landslide that swept the Ferguson government with such a majority with at least 60 supporters in a house of 112 members carried down to defeat with it J. G. Lethbridge, the 74-year-old Progressive party leader who waged a hard fight in West Middlesex, which he had represented since 1919. He lost the seat in a three-cornered contest to Dr. L. W. Freese, the Conservative candidate by the slim minority of 39 votes.

W. E. N. Sinclair, K.C., the Liberal leader, saw his forces, which numbered 21 in the last house, dwindle to nine. He was re-elected in Ontario South, but his majority of more than 2,000 in the 1926 election was cut down to a bare 1,000.

## Submarine Sets Depth Mark

**Spezia, Italy.**—The Italian submarine "Tito Speri," 830 tons, submerged to the extraordinary depth of 343 feet in tests and remained there 20 minutes. Experimental hydro-phonics communication was carried on from the depth with the submarine "Seiesa" on the surface.

## Favorite Star Goes C.P.R.

Traveling from Winnipeg to Montreal by Imperial Limited, Czech Canadian actress, Colleen Moore, smiling. She got her first glimpse of the prairies and the East from the luxurious compartment of a Canadian Pacific train de luxe. She told interviewers that she had been in a condition of amazement all through her trip and the word "wonderful" was continually on her lips. She is shown here stepping from the train at the Windsor Street station, Montreal, just before receiving an ovation from her countless admirers who gathered at the depot and later at the theatre where she appeared in person.

## FAIRMA WOMAN EXPLORER

Lady Richmond Brown, distinguished woman explorer, who has arrived in New York from England. In January she leaves for the wilds again at the head of an American-Indian expedition, with Mr. M. Mitchel Hedges, famous explorer, will be connected. She was with Mr. Hedges when his party discovered the Chuquicamata Indians in a hitherto totally unknown part of Panama.

## Edmonton Students Hear Unusual Lecture

### Former German Officer Gives Address At Edmonton Military Academy

**Edmonton, Alta.**—With a former commander in the Imperial German navy relating his own experiences in the battle of Jutland, famous naval engagement of World War I, the Edmonton military academy heard an unusual lecture here.

Erich Alteveerd, who fought as a German officer in all the major naval engagements of the war, and to whose address the academy listened, came to Alberta two years ago, and is now a progressive farmer in the Brighouse district.

### Albertan Wins Huge Sum

**Quebec.**—George Kowalchuk, of Hackett, Alberta, and James Westcott, of Springfield, Mass., won the first two prizes each amounting to \$7,500 in the Arctic and Newfoundland sweepstakes on the Canadian bridges race at Newmarket, England. The sweep was arranged so that each horse was drawn by two ticket holders. Both of these men drew double life.

### Arab Boycott In Jerusalem

**Jerusalem.**—Two hundred Jewish shopkeepers of the old city submitted a memorandum to the high commissioner, Sir John Chancellor, declaring that an organized Arab boycott of Jews was still going on. Arab pickets were said to be watching the entrance of Jewish shops destroying all goods purchased there by Arabs.

### Favorite Star Goes C.P.R.

## May Abolish Capital Punishment

**Question Is Now An Issue In British House Of Commons**

**London, Eng.**—The House of Commons adopted an amendment for appointment of a committee to report on the possibility of abolition of capital punishment.

When debate opened on a private member's resolution for abolition of the death penalty, Right Hon. John R. Clynes, secretary for home affairs, expressed government sympathy with the idea, but said the question of an alternative to such punishment was the rock on which Premier Ferguson based his appeal to the people.

He agreed with the amendment finally adopted for study of the matter, which he hoped might lead to some practical result.

In the course of the discussion, Lord Astor expressed great disappointment in the attitude of the minister. She had broken a ten-year custom earlier in the year by appearing at the afternoon session without a hat as most of the other women have done regularly.

## Solved His Problem

### Immigrant Out Of Work Broke Window To Get Jail Term

**Saskatoon, Sask.**—Failing in his search for employment during the past month and being without friends in this country, Joseph G. Jackson, immigrant, solved his part of the unemployment problem by throwing a brick through the plate glass window of the government liquor store on Third Avenue.

The crash of the glass evidently went unnoticed at the time so Jackson hunted up a sergeant of the police and told his story, and was taken to the cells. In police court he admitted his guilt and stated that he fully expected to go to jail, and was not disappointed for Magistrate Brown sentenced him to six months in Prince Albert.

### Received News By Radio

#### And V.C. Holder Isolated Settlement Will Attend Prince's Dinner

**Winnipeg.**—Word of the Prince of Wales' dinner to be given November 9, in honor of all those who won the Victoria Cross, trickled into a little settlement of families from Salmon Arm, B.C., recently. Major J. McGregor, stationed at the little settlement, received the news over the radio.

Major McGregor, whose valor on the field of battle while serving with the 2nd Canadian Rifles, earned him the V.C., lost no time in setting out on a hurried trip to New York from where he sailed on the S.S. Olympic for London. He raced 100 miles by auto to the railway station at Salmon Arm, where he arrived only fifteen minutes before his train left.

## DOMINION STATUS FOR INDIA WILL BE CONSIDERED

### London, Eng.

A London newspaper published what purports to be a summary of the report of the Indian central committee, appointed under Sir Nankarran Mair, from members of the Indian legislature, to work in co-operation with the Simon commission on statutory reform. The commission has concluded its work after a month in London, and is ready to submit a unanimous report to the viceroy of India, with whom lies discretion regarding publication.

The newspaper report, however, suggests the committee practically recommends something like Dominion status for India and full autonomy for the provinces.

The newspaper continues that the report recommends formation of an Indian privy council under the chairmanship of the viceroy. It demands that the Indian parliament be given greater control of the army votes and expresses the opinion that India, if left free, would desire to recruit its police service largely from England, but that India would be able to maintain its own judicial service.

**Delhi, India.**—Viceroy Lord Leroy was said today to intend to issue a proclamation which will deal with the question of Dominion status for India and announce the summoning of a conference in London to discuss the future constitutional development of India.

It was assumed that pending the decision of the British government in regard to recommendations that may be made by the Simon commission, the proclamation will make no distinct promise that will indicate the policy of Great Britain.

## CANADA OFF GOLD STANDARD FOR SOME MONTHS

**Montreal.**—The Montreal Star says that "because of the stringency which has existed in Canada for money and in order to protect Canada's position Canada has been unofficially off the gold standard for the past six months. At the verbal request of the Minister of Finance, the banks have refrained from shipping gold, although Canada's money has been at a discount which made it profitable to ship gold to New York.

"Although the condition has been in existence for some time, was the result of the action of the finance minister of the Dominion had taken the step which investigation now shows that he had. The situation is one which is regarded as being extremely acute and conclusions should not be arrived at hastily. When the move was made to place an embargo upon gold, some six months ago, Canadian banking officials were frightened by the prospect of private manipulators using American money and demanding gold of the Canadian government.

"The entire financial structure of the Dominion would have been gravely endangered if the finance minister had been placed in the position where he would have been forced to refuse gold in redemption of Dominion currency. The huge profits which could have been made by the transfer of gold have been disregarded by those who were in a position to take advantage of the situation.

"The normal results of the crash in the New York Stock Exchange and other exchanges throughout the world will bring about an alleviation of the demand for New York funds. The drastic reduction expected in funds on call in New York will be one of the main factors in bringing about a substantial betterment in the Canadian gold," the paper concludes.

## Destroyers Ordered To China

### U.S. Division Intended To Remain At Manila Several Months

**Manila.**—Orders despatched the 45th destroyer division immediately to Chinese waters, "in view of a possible need there," were received at Manila, where the fleet was.

The destroyers arrived here recently for the navy day celebration, and had apparently intended remaining for some months.

Naval officials were reluctant to discuss the order returning the destroyers fleet to China, whence it had just returned.

## Is Protecting Employees

### Chairman Of Chicago Firm Guarantees Stock Market Account

**Chicago, Ills.**—In a copyrighted article, the Herald Examiner said that Julius Rosenwald, chairman of the Board of Sears-Roebuck and Company has guaranteed the stock market accounts of the more than 40,000 employees of the company.

He has pledged his personal fortune of millions of dollars to prevent any employee saving swept away, the story said.

**Terminal Bins Again Full**

**Winnipeg.**—By a forward bound of one-third of a million bushels in 24 hours, grain storage at the head of the lakes, on Oct. 30, stood at a new high mark for the season. A total of 75,407,000 bushels were packed into the high-piled bins—200,000 bushels more than at any time since the movement of 1929 grains began.

**Russians Condemned To Death**

**Moscow.**—According to despatches of the Tass News Agency, twelve Russians were condemned to death in various parts of the country for crimes that ranged from murder and arson to anti-Soviet agitation. They included two priests, one Mullah and four rich peasants.

### Act May Be Amended

**Ottawa.**—The next session of Parliament may see amendments to the insurance act covering the investments of insurance companies in common stocks, it was learned here.

Blending Red Rose Tea is an art. To obtain the fine flavor and full-bodied richness required years of experience. Every package guaranteed.

# RED ROSE TEA

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros.

Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winton, a beautiful singer, and makes her famous too. When Al goes to Paris to about two years old, Molly slopes with John Perry, Al's best friend, taking the child. Al never later learns where she is. Now he is ready to sail for France that afternoon. He calls her on the phone, and begs for the chance to say goodbye to Jun'or. "I'll see you again," he says to the park entrance. It is a tragic farewell, for Al adores his boy. Jun'or says, "Do you feel bad?"

### CHAPTER XX.

"I'm all right, Jun'or," said Al. "No, I don't feel bad. I'm just awfully happy to see you. I'll tell you something—you're going far away to another place on a great big boat. Take care of mother and don't let anything happen to her. Be good to her. And remember—you'll see daddy again; we must both wait for that time."

In the distance the nurse-maid was consulting the chauffeur as to the time. He looked at his watch and decided they should be getting back to the hotel. Al looked up to see the severe-faced nurse standing before him.

"I'm sorry," she said firmly, "but it's time for the young gentleman to return to his mother."

Jun'or turned on her quickly. "But I don't want to go."

The nurse tried to smile, but Jun'or continued with baleful sternness. "If you take me away so soon I won't like you."

Al rose, gathering Jun'or in his arms. "Shh—Jun'or. It isn't nurse's fault that you have to go. You must be a good boy, every way, every day!" Then Al turned to the nurse. "I'll bring him over to the car. Will you please go on ahead?"

The nurse hesitated. Then she said: "Al made that one hundred-foot walk to the car last as long as possible. Would this really be the last time he ever saw Jun'or? Perhaps not, but it was quite possible that Jun'or would be a strapping youngster the next time they came together. If so his adorable baby sayings and his sense of baby gaiety would be gone. His sweet, confiding ways would be replaced by a boyish self-sufficiency. He might even forget his father entirely."

These thoughts travelled like burning darts through Al's mind. It was horribly possible for him to give up this little being of humanity? Could he live afterwards? And then came the thought—to take Jun'or by force, jump into taxi and drive off with him. For a moment this idea persisted with startling intensity. It would be so easy, and he would be justified in doing it!

But, no, Al just couldn't do it—he wasn't made that way. He was kind, generous, chivalrous. He loved Molly in spite of what she had done to him, and he knew she

had taken note of the fact that it stood beside a small, bare oak tree with a curiously gnarled trunk.

The winter day was darkening already; nurses from the fashionable houses along the Avenue were bringing home their baby charges who had been playing all afternoon in the park. There was a procession of them—babies in perambulators, little tots of two, three and four, carried in their nurses' arms or trotting along beside the women. Many were dressed in skins. Jun'or, some looked very like him. Al stood, slightly away from the sidewalk, peering eagerly into the little faces, listening to the chatter and chilblah laughter. These youngsters—they were going home to happy nurseries, to fathers and mothers who loved them and were united.

How uncanny it was, thought Al, that this procession of babies passed him just at this time, when he had lost Jun'or. He stood like a statue until long after the last youngster had disappeared and the last remonstrating tones of the chattering French nurses had died away.

Then he had to turn his face away again as he pressed Jun'or to him. He said haltingly: "Don't forget, Jun'or, your mother loves you—you're going to be awfully happy with her. Don't worry—about the pain of his loss.

He walked slowly, asking himself—"Where was he going? Back to the apartment where Celeste, the maid, waited with pitying eyes, back to Jun'or's nursery? No, he couldn't do that. He must tell Celeste tomorrow that he was giving up the apartment. He would go to a hotel to live.

But what were his plans? He gave up his plans, something to engage his interest. He would go crazy with the pain of his loss. That was Al's big problem at the moment, and he knew it. Without plans he would be continually whirling in an emotional chaos.

He had plenty of money—that wouldn't worry him. And he knew that Molly had saved away everything she had earned as a singing girl. She was amply able to provide for Jun'or. Besides, John Perry had made himself rich as a boot racketeer. No, the money angle could be set aside.

(To Be Continued.)

## HOW TO RELIEVE CHILDREN'S COLDS

### Avoid Serious Results By Using Baby's Own Tablets

When a child shows the first symptoms of a cold, such as sneezing, redness of the eyes, clogged or runny nose, prompt measures for relief may be safely resorted to. Mothers should always have on hand some simple safe and effective remedy.

Baby's Own Tablets are quick, contain no opiates or narcotics, are tasteless and harmless. Concerning them Mrs. Jean Cadieux, Holyoke, Mass., says: "I have given Baby's Own Tablets for my children and find them a very satisfactory medicine. When my little boy had a cold I gave him Baby's Own Tablets and he was well the next day. I gave them to the children for constipation and they are greatly benefited. I think Baby's Own Tablets make easier to give a child than liquid medicaments. I strongly recommend all mothers who have young children to keep a box of the Tablets in the house."

Baby's Own Tablets are sold by all medicine dealers or by mail at \$1.00 a box from the Dr. Williams Medicines Co., Brockville, Ont.

### Trade Within Empire

Canada Willing and Anxious To Extend Trade With Great Britain

Cables from Liverpool report the Hon. L. C. M. S. Amery, former Secretary of State for Dominion Affairs, as saying that the whole atmosphere in Canada was favorable towards doing business with Great Britain and the rest of the Empire—more than at any time in the past. "She is in extremely good shape, indeed," he said, "with a steady all-round development."

### A Clever Goose

A bright light of the goose world, in England, is Jimmy, a goose owned by a South Elsass miner. Leaping through a hoop, washing his face, tea dancing and jumping over his owner's arm, are the tricks he boasts of. His parades of acrobatics in a high chair at the table and his manners are said to be perfect. He also stands at attention and salutes whenever the national anthem is played.

The game of billiards is very popular with teachers, professors and other professional men in Japan.

The early native of Hawaii had beautiful dishes of wood, carved and polished.

Use Minard's Liniment in the Stables.

### A Law-Abiding Nation

#### English Obey Law and Support Authorities In Enforcing Same

No nation, not even the German, is more law-abiding than the English. Not only does the individual obey the law, but he supports the authorities in enforcing obedience on his neighbor.

"Not only is the criminal class in England small, and, to judge by the latest criminal statistics, diminishing, but the criminal himself shares with his more respectable neighbors the law-abiding instinct of the race," writes Godfrey Layton, in the November Harper's Magazine.

"The safe-breaker," surprised in the midst of his nefarious operations by the solitary policeman on his beat, may in nine cases out of ten be expected to 'go quietly.' He is himself unarmed, and he knows that the policeman is unharmed, except for a 'truncheon' or club, so carefully concealed that I, the average citizen, have never even seen one in the hands or anywhere about the person of a policeman, although I know that it is there. There is a recognized etiquette in these matters.

If the safe-breaker or burglar can't find a job and get away unseen, the gates will be closed and the safe-breaker will be forced to leave the country.

The gates will be the largest locks in the world; in length they exceed the locks of the Panama Canal by one-third, in width by one half. The largest ships afloat, the Leviathan and the Majestic, will be able to pass these locks without any difficulty.

The preliminary depth of thirty-eight feet will give to the canal a profile with an area of about 140,000 square feet. This is more than the Suez Canal and a little less than the Panama Canal.

The gates weigh nearly 1,200 tons each. They are opened by rolling them back into recesses of exactly the same size in the north wall. As no dry dock is available in the neighborhood which could accommodate the gates in case of necessary repairs the recesses had to be fixed up as dry docks. There are two gates in the western end of the lock chamber, one of which is used as a reserve lock to replace either of the other two. The lock chamber can be filled in less than seven minutes. When the tide is very high it will take a little longer. The whole lock is operated electrically.

### Holland Builds Largest Locks

Third Longer, and Half as Wide Again as Panama Canal Locks

The most important of the numerous canals in Holland is the one which since 1876 has connected Amsterdam, Holland's second seaport with the ocean. With the gradual increase in the size of the ocean-going vessels, says the Netherlands News Bureau, this canal had to be widened and deepened until at present it belongs, according to its dimensions, to the same class of large, internationally known artificial waterways as the Panama and Suez Canals. The North Sea canal has only one set of locks. These separate the turbulent waters of the North Sea from the calm, uniform surface of the waterway and the many, lighter-smooth canals and ditches. The locks are located at the coast near the town of IJmuiden, one of the important fishing centers of Holland.

As the canal has grown, so have the locks. Those in use at the present time admit ships of about 20,000 registered tons to enter Amsterdam. The ever increasing tonnage, especially of the modern liners, made imperative the construction of new locks which would be able to accommodate ocean vessels of any size. The locks have been under construction for a number of years and are expected to be ready early in September.

They will be the largest locks in the world; in length they exceed the locks of the Panama Canal by one-third, in width by one half. The largest ships afloat, the Leviathan and the Majestic, will be able to pass these locks without any difficulty. The preliminary depth of thirty-eight feet will give to the canal a profile with an area of about 140,000 square feet. This is more than the Suez Canal and a little less than the Panama Canal.

The gates weigh nearly 1,200 tons each. They are opened by rolling them back into recesses of exactly the same size in the north wall. As no dry dock is available in the neighborhood which could accommodate the gates in case of necessary repairs the recesses had to be fixed up as dry docks. There are two gates in the western end of the lock chamber, one of which is used as a reserve lock to replace either of the other two. The lock chamber can be filled in less than seven minutes. When the tide is very high it will take a little longer. The whole lock is operated electrically.

For Rent—One five room cottage  
Apply Mrs. L. Nichol, Crossfield.

#### RESULT OF TURKEY SHOOT

We publish below a detailed  
account of receipts and expenditures  
of the turkey shoot and  
dance held in aid of the Cross  
he d baseball club

Receipt of Dance	45.25
4 lace	\$ 25.00
Hall	15.00
Fowl sold Oct. 19th	24.00
Fowl sold Sat. Oct. 20th	23.00
Stalls sold	15.00
Total cost of Fowl	190.00
Cay pigeons	10.00
Stalls	15.00
Net on Fowl sold Oct. 21st	6.00
Net on Ma Ma Doll	3.25
Advertising	10.50
	\$329.50 \$25.50
Net profit to ball club	\$94.00
	\$320.50 \$25.50

We wish to take this opportunity  
to thank very heartily all  
those who so kindly assisted us in  
the many jobs we had to do, and  
those who contributed so freely  
to make this the success it was.

To those whose minds are so small and  
mean that they take advantage of an  
opportunity like this to steal we have this to  
say: "If you enjoyed the turkeys when  
you eat them and your conscience bothers  
you put the price of them in an envelope  
and address it to the secretary and nothing  
more will be said."

The CROSSFIELD BASEBALL CLUB

### C. G. I. T. CLUB

The junior girls club, held a very  
enjoyable Hallowe'en party at the  
home of their leader, Miss Gladys  
Metheral. The girls came in fancy  
dress costumes, the prize for the  
best one going to Jessie Young. A  
number of games was played, the  
Jack-o'-lantern contest being won  
by Margaret Fitzpatrick. Lunch  
was then served and consisted of  
apppetizing Hallowe'en goodies.

The senior club, held a party at  
the home of Mrs. R. M. McCool,  
when they entertained their guests  
with many and varied games,  
causing a great deal of merriment.

The presence of an old witch  
added much to the entertainment,  
and caused some excitement when  
she handed each girl a forty ie.

#### Local and General

Subscribe to The Chronicle you enjoy

reading it.

Mr. Paul Royer was a business visi-

tor to Calgary on Wednesday.

Mrs. Jarman and Phyllis were

Calgary visitors on Wednesday.

Mrs. Patmore took first prize at the

Carstair's masquerade on Friday last.

Mrs. W. Gilson has returned home,

after a three months holiday spent

with her parents, Mr. and Mrs. Alles

at Elmoira.

Miss Frances Mobbs and Miss

Eva Jarman spent the weekend in

Calgary.

Mr. Frank Mossop has been ap-  
pointed Registrar of Vital Statistics.

Mr. Hay and Bill Murdoch, spent  
a very enjoyable week-end deer  
hunting, out west.

Mr. A. W. Gordon and Stella,  
were visitors at Olds for a few days  
last week.

Ruth Stauffer, who is attending  
the Calgary Normal school, spent  
the past week-end at home.

Miss Alice Collett and Miss  
Gladys Metheral were visitors to  
Calgary on Saturday.

We are pleased to report that  
Mr. W. Emerson is at home again  
after his recent operation.

Mrs. Patmore took first prize at  
the Carstair's masquerade on Friday

last.

Mrs. W. Gilson has returned home,  
after a three months holiday spent

with her parents, Mr. and Mrs. Alles

at Elmoira.

Among the local business men

who are big game hunting are:

C. W. Donald, W. J. Wood and

G. Gazeley.

Don't forget the special Thanksgiving  
service in the United Church, on  
Sunday. The choir is preparing  
special music.

Mr. and Mrs. L. Pike were Cal-  
gary visitors on Monday.

Mr. and Mrs. W. Perron, of Cal-  
gary, were visitors in Crossfield on  
Sunday; guests at the home of Mr.  
and Mrs. M. Pike.

The Sunshine Junior U. F. A.  
held a very successful Hallowe'en  
Dance at the school house Friday,  
Nov. 1. The proceeds amounting  
to \$60.00.

### LITERARY SOCIETY

The Literary Society was held in  
the Masonic Hall on Wednesday  
afternoon at 3:30 o'clock.

The programme was in charge of  
Mr. Hay's room and was:

1. Piano solo by Grace Williams.  
2. A sketch by Vevey Green, May  
Stauffer and Frank Mair.

### Chicken Supper and Dance

Monday, November 11th

The Ladies of the C. W. L. are  
serving a chicken supper followed

by a concert and dance under dif-  
ferent management on Monday  
November the 11th; in the U. F.  
A. Hall, Crossfield. Chicken sup-  
per from 6 to 8 o'clock. Adults  
50 cents, children 25 cents. Dance  
extra.

### Hockey Meeting

A meeting will be held in the  
Oliver cafe on Tuesday November  
12th, for the purpose of organizing  
a hockey club for the coming season.

There is sufficient hockey mate-  
rial in this vicinity to make up a  
team equal to any on this line Cross-  
field leads: The Baseball field with  
organization and Cooperation and  
the same can be accomplished in  
hockey circles. Get the Solar,  
We lead others folk w."

### Red Cross Dance at Beaver Dam Hall, November 15th

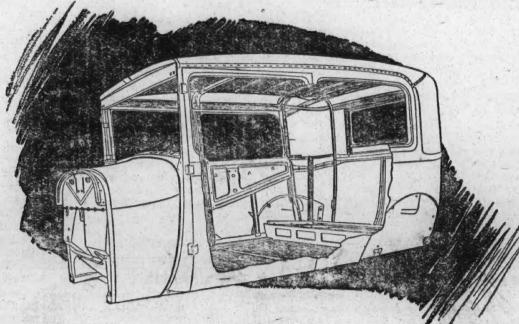

A Red Cross dance will be held  
at the Beaver Dam Hall, November  
15th. Remember the date.

### Chicken Supper

#### Friday, Evening, November 22nd

The Floral U. F. W. A. have  
decided it necessary to change the  
date of their chicken supper and  
dance to Friday, November 22nd,  
when they hope for a big turn out  
of friends of the community.  
There will be a fine supper and  
Calgary music.

### THE FORD CAR STEEL BODY

### Combines Strength with Beauty

THE high grade steel used in building Ford  
car bodies gives maximum driving protec-  
tion. Beauty of design has been combined with  
rugged strength in these all-steel bodies. The  
wood parts shown in the diagram are used  
only for attaching the interior trim and roof  
material.

If this body—that of the Tudor Sedan in this  
instance—mounted on a Model "A" chassis,  
were turned over and resting on the roof, it  
would support the chassis, engine and all without  
even bending the narrow window pillars.  
Such is the strength and high safety factors of  
Ford engineering.

Vision obstruction is reduced to a minimum  
by the use of narrow steel pillars. Lower rear  
panels, including the wheel housing, are made  
in one piece. This unusual feature on body  
construction gives additional strength.

Electrical welding adds greater rigidity and reduces  
the possibility of squeak and rattle. Panels and frame  
sections are welded or riveted. In assembly of large  
units where bolts are necessary, strips of anti-squeak  
material are used between sections. Sound deadening  
material is also used. Soft roof construction, of heavy  
padding over galvanized mesh wire, provides an ad-  
ditional element of quietness.

#### Drive it Yourself— there is no Better Test

#### Ford Car Features

Chasis of colour  
55 to 65 miles on hour

40-horse power engine

Fully enclosed air-brake system

4 Houdaille double shock absorbers

10 to 20 miles per gallon of gasoline

Shatterproof glass windshield

Thief-proof ignition lock

Reliability and low upkeep

Arrange for your demonstration ride with the  
nearest Ford dealer
